TEACHERS'S DAY

5TH SEPTENBER

LECTURER'S MESSAGE

Success is not a one-time event. It is the result of consistent improvement over time. It iswhen you strive to be better than yesterday, every single day. It is the accumulation of your efforts and achievements. – Dwayne Johnson
Education is the passport to the future, for tomorrow belongs to those who prepare for it today. This famous quote by Malcolm X captures the essence of why learning is so important for our personal and professional growth.

I will share with you some of the benefits of education and how you can leverage it to achieve your goals. First of all, education helps you develop critical thinking skills that are essential for solving problems and making decisions. By exposing yourself to different perspectives and sources of information, you can learn how to analyse, evaluate, and synthesise information and form your own opinions. This will enable you to think creatively and innovatively, and to adapt to changing situations. Secondly, education opens up opportunities for you to pursue your passions and interests. Whether you want to start your own business, advance your career, or explore a new field, education can provide you with the knowledge, skills, and credentials that you need to succeed. Education can also help you discover new interests and hobbies that can enrich your life and make you happier. Thirdly, education connects you with other people who share your values and goals. By joining educational communities, such as schools, colleges, online courses, or professional associations, you can network with peers, mentors, and experts who can support you in your learning journey. You can also learn from their experiences, insights, and feedback, and contribute to their learning as well.
In conclusion, education is not only a passport to the future, but also a key to the present. By investing in your education, you can improve your personal and professional development, access more opportunities, and build meaningful relationships. Education is a lifelong process that never ends, so keep learning and growing every day.

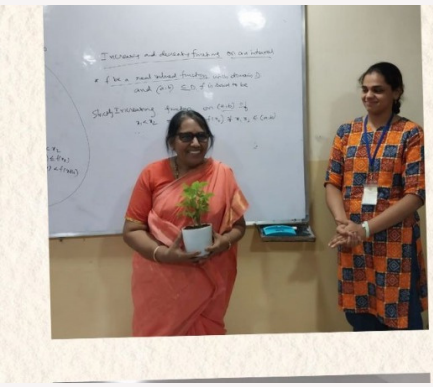
-EVENTS HAPPENING AT KSJC-

On September 15 , a session was conducted by Ms. Normal Bhagavathula about the measurements students can take to deal with academic pressure. She is a retired mathematics and physics high school teacher. She is also a volunteer psychological counsellor at Roshini Helpline. She suggested few measures that can be taken to deal with stress and promote anxiety reduction.
The was conducted for juniors only.



NDA SESSION

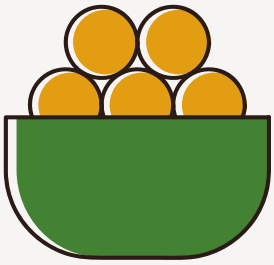
On September 26, our college conducted a NDA session by Lt. College B.G Ray is the founder and chief training officer, IFDO , hyd. He inspired students to join the new defence career institute ,which provides information, motivation, and training for multiple career opportunities in the defence sector.

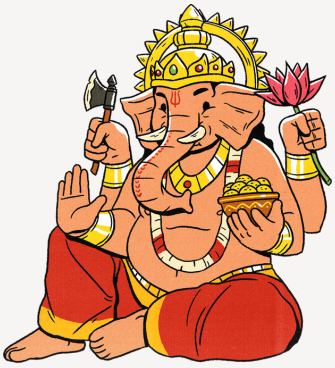
FRESHER'S DAY

On the 3rd of September, our college had organized Freshers Day Programme for all the students at the KMIT campus. It was a fun filled afternoon with entertaining dance & singing perfomances by the students. The program came to end with an open dance floor. It was truly memorable day for all the students.

GANESH CHATURTHI

Ganesh Chaturthi is a significant Hindu festival celebrating the birth of Lord Ganesha, the elephant-headed deity. It typically falls in August or September. Devotees across India engage in elaborate rituals, including idol installation, prayers, and cultural events. The festivities span ten days, concluding with the immersion of idols in water bodies. This festival fosters community bonding and spiritual renewal, symbolizing the removal of obstacles. It holds deep cultural and religious importance, uniting millions in joyous reverence.





TEACHER'S DAY

In India, Teacher's Day is observed on September 5th to honor Dr. Sarvepalli Radhakrishnan's birthday. Teachers are like beacons of inspiration, showing us the way and sharing their wisdom to shape the future generations of the world. This special day reminds us of their unwavering commitment and hard work for our benefit.

JANMASHTAMI - THE STORY OF BIRTH OF LORD KRISHNA

The story As It Goes.....

It is said that lord Krishna was born in Mathura Prison. Therein, his life was in danger from his maternal uncle, kansa. The tyrant Kansa, was told by a voice in the sky that one of her children would kill him. Kansa decided to kill Devaki so that she does not give rise to any children, but Vasudeva, her husband begged Kansa to forgive Devki and promised that he will give any of her child to Kansa, so then Kansa on this assurance from Vasudev, let Devki go. He imprisoned both Devaki and Vasudeva. Kansa made sure that none of her children survived. Therefore, in order to protect lord Krishna, his father Vasudev carried him in a basket across the raging River Yamuna to Vrindavan. There Krishna was adopted and brought up by Yashoda and Nanda.Shri Krishna was born to Devaki and Vasudev, however was brought up by Yashoda and Nanda in Vrindavan.

People celebrate Janmashtami at midnight, because it is believed that Lord Krishna was born at midnight. The devotees keep fast to show gratitude and devotion to lord Krishna. Since Sri Krishna was fond of eating Makhan, people play this sport where an earthen pot or matki is tied high from the ground. Moreover, a person fills Makhan in the matki. Besides, people build a human pyramid to break the matki.

WORLD SUICIDE PREVENTION DAY

"Creating Hope Through Action"

Suicide is a major public health problem with far-reaching social, emotional and economic consequences. It is estimated that there are currently more than 700 000 suicides per year worldwide, and we know that each suicide profoundly affects many more people.

"Creating Hope Through Action" is the triennial theme for the World Suicide Prevention Day from 2021-2023. This theme serves as a powerful call to action and reminder that there is an alternative to suicide and that through our actions we can encourage hope and strengthen prevention.

By creating hope through action, we can signal to people experiencing suicidal thoughts that there is hope and that we care and want to support them. It also suggests that our actions, no matter how big or small, may provide hope to those who are struggling.

Lastly, it serves as a reminder that suicide prevention is a public health priority and urgent action is required to make sure suicide mortality rates are reduced. WHO will continue to work with its partners to support countries to take concrete measures in this direction.

World Suicide Prevention Day (WSPD) was established in 2003 by the International Association for Suicide Prevention in conjunction with the World Health Organization (WHO). The 10 September each year aims to focus attention on the issue, reduces stigma and raises awareness among organizations, governments, and the public, giving a singular message that suicides are preventable.

ADITYA L1 MISSION

The first solar observatory of Bharat, Aditya L-1, has embarked on its journey towards the sun-earth L1 point on September 2. The satellite has been successfully placed in its intended orbit by the vehicle's precise positioning. PSLV-C57's launch of Aditya L1 has been a success. Aditya L1 will be India's inaugural space-based mission dedicated to studying the Sun. It will be positioned in a halo orbit around the Sun-Earth system's Lagrange point 1 (L1), which is located approximately 1.5 million km away from Earth. By being in the halo orbit around the L1 point, the satellite will have the significant advantage of being able to continuously observe the Sun without any occlusions or eclipses. This will enable real-time monitoring of solar activities and their impact on space weather. The spacecraft is equipped with seven payloads, including electromagnetic, particle, and magnetic field detectors, which will facilitate the observation of the photosphere, chromosphere, and corona of the Sun. Four of these payloads have a direct view of the Sun, while the remaining three conduct in-situ studies of particles and fields at the Lagrange point L1, providing valuable insights into the propagation effects of solar dynamics in the interplanetary medium. The mission's duration is set for 5.2 years, during which it will study the Sun and solar phenomena around Earth.

The Aditya L1 payloads are expected to yield crucial information for comprehending the issues related to coronal heating, coronal mass ejection, pre-flare and flare activities, characteristics of space weather dynamics, and the propagation of particles and fields.

G20 SUMMIT

The G20 or Group of 20 is an intergovernmental forum comprising 19 sovereign countries, the European Union (EU), and the African Union (AU). It works to address major issues related to the global economy, such as international financial stability, climate change mitigation and sustainable development.The G20 is composed of most of the world's largest economies' finance ministries, including both industrialised and developing countries; it accounts for around 80% of gross world product .In September 2023, at the 18th G20 Summit, Indian PM Narendra Modi announced that the African Union has been included as a member of the G20, making it the 21st member.India has held the G20 presidency since 1 December 2022, with its presidency's theme being Vasudhaiva Kutumbakam or "वसुधैवै कुटु बकम्" in Sanskrit or translated as "One Earth, One Family, One Future'" in English.[A][38][39] and the summit was held from 9 September 2023 to 10 September 2023 at Bharat Mandapam, New Delhi.As of 2023, there are 21 members in the group: Argentina, Australia, Brazil, Canada, China, France, Germany, India, Indonesia, Italy, Japan, Mexico, Russia, Saudi Arabia, South Africa, South Korea, Turkey, the United Kingdom, the United States, the European Union and the African Union. Guest invitees include, amongst others, Spain, the United Nations, the World Bank and ASEAN.

UNSUNG HERO, NATHURAM GODSE

Nathuram Vinayak Godse (19 May 1910 – 15 November 1949) was the assassin of Mahatma Gandhi. He was a Hindu nationalist from Maharashtra who shot Gandhi in the chest three times at point blank range at a multi-faith prayer meeting in Birla House in New Delhi on 30 January 1948

Godse had two unsuccessful attempts to assassinate Mahatma Gandhi in 1944 before he succeeded the third time.After the 1948 assassination, Godse claimed Gandhi favoured the political demands of British India's Muslims during the partition of India of 1947.Soon after Mahatma Gandhi had fallen from the fatal shots at the prayer meeting, and while the attendant crowd was in shock, Godse was grasped and restrained by Herbert Reiner Jr., a vice-consul at the new American embassy in Delhi who was also attending. eventually, Godse was taken away by the police.Godse was a member of the political party, the Hindu Mahasabha, and a member of the Rashtriya Swayamsevak Sangh (RSS), a right-wing Hindu paramilitary volunteer organization and a popularizer of the work of his mentor Vinayak Damodar Savarkar, who had created the ideology of Hindutva.

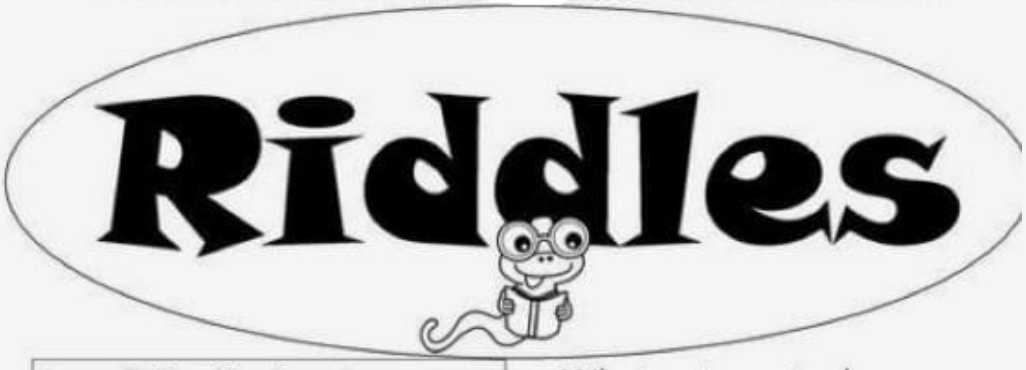
RIDDLES!!



I am full of holes; I can hold water. What am I?

SPONGE

What gets wet when drying?

TOWEL

What are two things people never eat before breakfast?

LUNCH AND DINNER

What is it the more you take away the larger it becomes?

HOLE

What has two hands and a face, but no arms and legs?

CLOCK

What can't be used until it's broken?

EGG

What has 4 legs and only 1 foot?

BED

What has many keys but can't open any doors?

PIANO

A REMINDER

Poetry doesn't have to rhyme,
It's okay if you need to cry
Don't be so hard on yourself,
you perfectly fine
i know things have been hard
but you'll soon be alright
So have a little walk and
look at the sky
Don't stress so much,
it's a small life
Trust the universe, come on
now, put on a smile
You'll never know when this
moment will passby.
